CSCI 110 Section 1

Name: _____

Quiz 2: Variables and types

Friday, August 19, 2016

1) Identify the types of the following values [4 points]

    ```
    2843.0          _____
    "Foo Bar"       _____
    -1.54           _____
    "false"         _____
    ```

2) Fill out the table for all of the variables in the block of code. You should record the values as they are at the end of the block. [4 points]

    ```
    float x = 8.5;
    String friend = "Joe";
    boolean y = false;
    friend = "Jennifer";
    float z = 900.0;
    friend = "Jason";
    y = true;
    x = z;
    z = 8.5;
    ```

Name	Type	Value

3) Declare a variable 'name' of type String with your name as a value. [1 point]

4) What's the value of `result`? [extra credit, 2 points]

    ```
    int y = 23;
    boolean result = (y + 2 == 25);
    ```
